

DICAMBA 4L DMA & DICAMBA/2,4-D DMA

The Dicamba family of herbicides from ADAMA offer growers high-quality formulations that provide weed control growers rely on. With two options, growers can choose the formulation that best fits their needs.

We bring you the options you need, that are manufactured here in the US, that let you farm your way. You can trust in our formulations' quality and performance.

Dicamba 4L DMA

- For weed control in corn, cotton, sorghum, soybeans and many more
- Controls many annual broadleaf weeds or gives growth suppression of many perennial broadleaf weeds
- Works bests when weeds have emerged and are small
- Water-soluble formulation
- Group 4 herbicide

Dicamba 2,4-D + DMA

- For weed control in sorghum, wheat, corn, soybeans, cotton and more
- Powerful mode of action
- Wider application windows
- Helps to fight herbicide resistance
- Trusted weed control
- Group 4 herbicides

Always read and follow label directions.
