

## Take control of your crop with Preface™ & Postscript™ in the FullPage™ Rice Cropping Solution

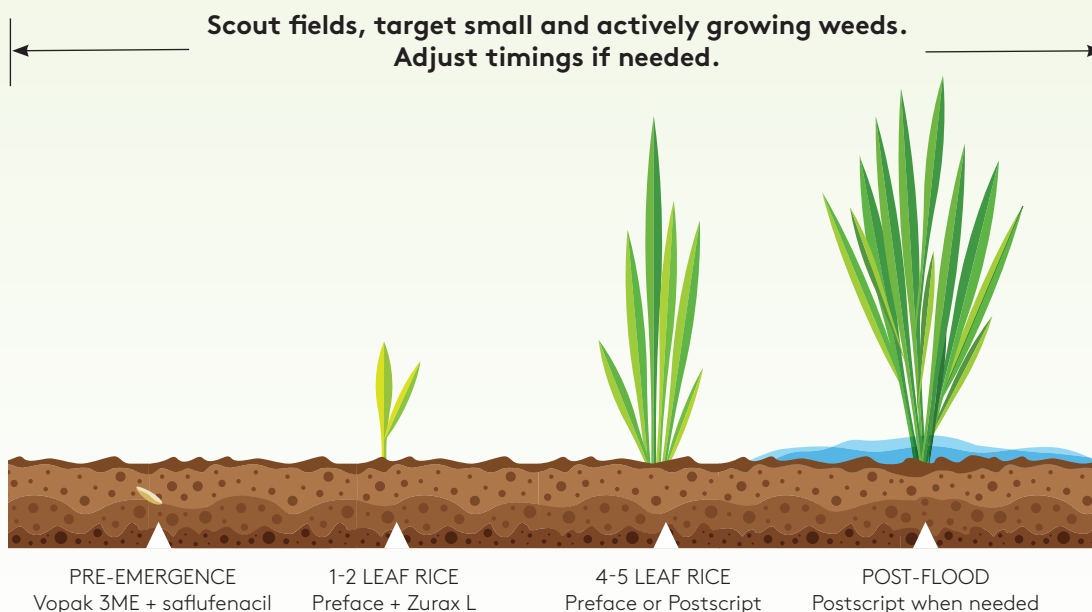

Preface and Postscript are specifically formulated for FullPage rice, which contains a new IMI herbicide-tolerance trait package

HERBICIDE	USE RATE
Preface	Use 4-6 fl oz per acre for post-emergence and residual control
Postscript	Use 5 fl oz per acre for post-emergence control

### The most flexible system in herbicide-tolerant rice

CROP STAGES	OPTION 1	OPTION 2	OPTION 3
	Standard for moderate infestations	For severe, susceptible red/weedy rice	When flooding is timely and less residual is needed
Pre-emergence Herbicide	Vopak™ 3ME + saflufenacil		
1-2 Leaf Rice	Preface at 5-6 fl oz/A + Zurax™ L		
4-5 Leaf Rice	Preface at 4-6 fl oz/A		Postscript at 5 fl oz/A
Scout fields in accordance with best management practices. Post-flood applications should be made if red rice was not completely controlled earlier.			
Post-flood	Postscript at 5 fl oz/A when needed		
Preface and Postscript should be applied with a crop oil concentrate except as noted on the label.			

## PREFACE AND POSTSCRIPT HERBICIDE APPLICATION TIMING

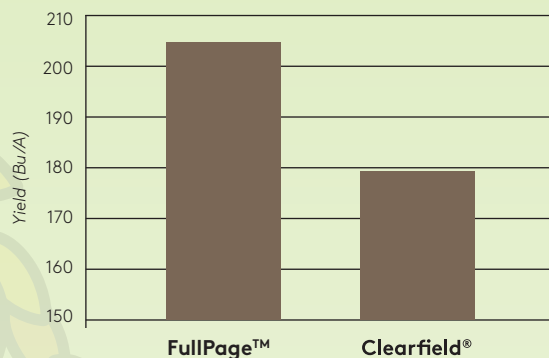

# Stewardship

Stewardship is critical to all rice herbicide-tolerant systems to prevent the development of herbicide-resistant weedy rice. Growers using the FullPage™ Rice Cropping Solution are required to sign a stewardship agreement when purchasing FullPage seed. Stewardship requirements are based on common best management practices for optimum weed control and resistance prevention.

## FullPage system vs. Clearfield

6-location Mean Yield

## Excellent Weed Control, Superior Crop Tolerance, Hybrid Yield Benefit, Increased Flexibility

Untreated

**Preface™**

Herbicide for **FULL PAGE™**  
Rice Cropping Solution

**Postscript™**

Herbicide for **FULL PAGE™**  
Rice Cropping Solution

### Only Preface and Postscript may be used on FullPage rice

- Rotate herbicide technologies and crops
- Make at least two applications of FullPage Rice Cropping Solution herbicides, consider a third application when needed (Postscript only)
- Spray post-emergence herbicides on small, actively growing weeds
- Use best water management practices to activate herbicides and keep weeds susceptible
- Stewardship includes a full program using additional standard rice herbicides
