

# Time To Move Forward

## Temper™ More is ADAMA's answer to the endless cycle of resistance management

Two powerful modes of action to overcome resistance and deliver residual activity in the same spray.

Controls resistant weed species such as common waterhemp, pigweeds and morningglory.

Extends the retreatment interval in glufosinate-resistant crops.

## Millions of US farmers rely on glyphosate to manage weeds, but its efficacy is slowly declining

There are 18\* known species of glyphosate-resistant weeds in the US alone, with more expected to develop resistance in coming years.

Provides economic improvement and less stress for growers in planning for the full season solution in HT soybeans, corn and cotton.

It's time to take a step forward.

Don't get left behind. It's time to move forward with

# Temper More
