

INSECTICIDE

DIAMOND[®]

INSECTICIDE

Diamond delivers superior, broad spectrum insect control for healthier, more profitable cotton.

Diamond. Superior Broad Spectrum Control.

Diamond delivers superior, broad spectrum insect control for healthier, more profitable crops, including soybeans, cotton and sorghum. With its unique mode of action, Diamond is a perfect alternative when battling resistance. Diamond has long residual activity to help reduce the number of spray passes, which saves money and increases return on investment. It is highly versatile in application timing, rates and tank mixes. Plus, Diamond is soft on beneficial insects and highly compatible with IPM programs.

Easy on Beneficials.

Fight pests with minimal impact on beneficial insects.
