

The smarter way for fruit growers to clean out sucking pests.

Delivers faster leaf penetration and plant uptake than Movento®

Controls sucking pests like aphids, psyllids, mites, scales, thrips and more

Works in citrus, pome, stone, grape, leafy green and fruiting vegetable crops

Improved leaf penetration helps protect the AI from rain and environmental loss

Has higher concentration of the AI in the droplets for enhanced performance

Flexible application window for growers with best results when sprayed early
