

# PALOUSE™ M

## Cereals Growers Have A Foundational Herbicide Treatment Option

Growers in the US know that a good foundational herbicide is needed when growing row crops like wheat, barley, oats and rye. ADAMA is proud to provide these growers with Palouse M, a broad-spectrum herbicide to control troublesome broadleaf weeds. Manufactured by ADAMA, Palouse M provides the confidence and predictability growers look for in weed control as well rotational flexibility they need to manage their feeds.

### Reliable Weed Control Growers Expect

Broadleaf weed control is a continual concern for US cereal growers. If not controlled early, these weeds can quickly get out of control. Palouse M herbicide helps control cocklebur, jimsonweed, lambsquarters and many more yield-robbing weeds and won't hurt your crop.

### Economical & Quality Input Options Growers Want

Broadleaf weeds that are allowed to gain the upper hand increase costs for growers. Palouse M is an economical herbicide solution that is manufactured by ADAMA, so you can trust in getting a high-quality product that works.

### Simplicity & Value Growers Need

Palouse M tank mixes well with other grass control herbicides, allowing you to take out both weeds and grasses in a single pass. This simplified process provides value to growers in both a time- and cost-savings. Additionally, the novel mode of action helps prevent herbicide resistance by providing rotational flexibility with other chemistries.
