\*Not for use in California. \*\*Days after planting

With Vantana from ADAMA, growers get broad-spectrum disease control with this Group 29 fungicide to combat resistance issues in an easy-to-use, high-quality liquid formulation. Kojami with two different and leading modes of action in an optimized ratio provides longer-lasting, broad-spectrum control for peanut diseases. Ask about other ADAMA peanut products such as Diamond®, Acephate, Silencer® VXN, Alias® and Fanfare® to complete your peanut protection program.
