

# Phenatic™

A reliable post-emergent herbicide that provides control of broadleaf weeds in cereal crops such as wheat, barley, oats and rye.

## What is Phenatic?

Phenatic is a Group 4 phenoxy herbicide that improves control of troublesome weeds like kochia, Russian thistle, mustards and pigweed. It's a good tank mix partner for various cereal herbicide programs to strengthen broadleaf control and support flexible weed management strategies.

## Grower Benefits

| Feature                                       | Advantage  |
|---|--|
| Group 4 phenoxy herbicide                     | Adds a different mode of action to cereal weed control programs  |
| Systemic activity within the weed             | Moves throughout the plant after application, helping ensure more complete control of susceptible broadleaf weeds  |
| Flexible tank-mix compatibility               | Integrates easily into programs to build broader-spectrum weed control without adding extra passes   |
| Post-emergence control of key broadleaf weeds | Allows growers to address weeds after emergence, helping clean up fields early in the season and protect yield potential while maintaining flexibility in application timing |

## Active Ingredient

MCPA 600

## Formulation Type

Emulsified Concentrate

## Target Crop

Wheat, Barley, Oats, Rye

## Target Weeds

Kochia, Lambsquarter, Morningglory, Mustards, Pigweed, Ragweed and many more

See label for full listing of weeds

# Phenatic™

## Wheat/Barley/Rye Application Guidelines

See the full product label for all application/usage instructions and restrictions.

  
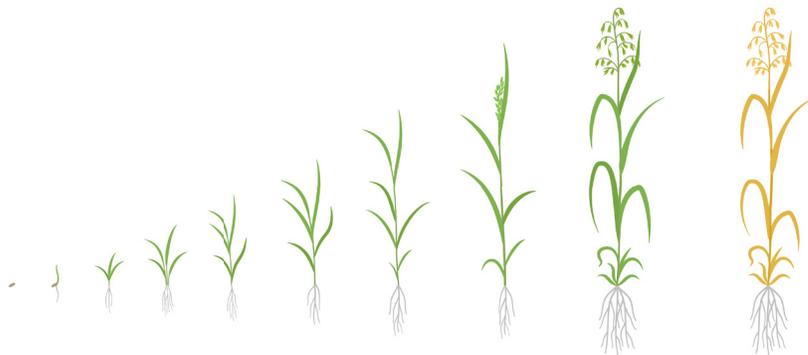

**Apply from  
 3- to 4-leaf  
 (8-10" tall)**  
 (Zadoks scale 22-24)

**Use 0.34 to 1.0 pints/acre for susceptible weeds.  
 Use up to 1.17 pints/acre for harder to control weeds.  
 DO NOT spray grain is in the boot to dough stage.**

## Oats Application Guidelines\*

See the full product label for all application/usage instructions and restrictions.

  
**Apply after oats  
 are fully tithered  
 (4"-6" tall)**  
 (Zadoks scale 22-25)

**Use 6.1 oz/a for annual weeds.  
 Use 0.76 pint/acre for perennial weeds.  
 DO NOT apply more than 1.17 pints/acre/year.**
