

DEKEL 170 EC

An effective post emergence, contact and systemic herbicide widely used to control annual grasses and broad leaf weeds

Active Ingredients:
Propaquizafop 50 + Oxyfluorfen 120 g/L

READ THE LABEL BEFORE USE

Precautions: Keep out of the reach of children and away from food, drink and animal feeding stuffs. Wear suitable gloves and eye/face protection. Use appropriate containment to avoid environmental container and avoid release to the environment.

First aid measures: **If in eyes:** Wash out with plenty of water with the eye lid wide open for 15 minutes, at least. **If Swallowed:** Wash out mouth with plenty of water. Never give anything by mouth to unconscious person. **If on skin:** Take off contaminated clothing and shoes. Rinse skin immediately with plenty of water for 15-20 minutes. **If inhaled:** Move victim into fresh air. Give artificial respiration, preferably mouth-to-mouth, if breathing is difficult. In all cases: Seek medical attention immediately; show product container or label.

Antidote: Note to physician: No specific antidote known; treat symptomatically and give supportive therapy.

Directions for use: Volume application of 200 L/ha, using a Hand-operated knapsack sprayer with deflector nozzle, is recommended.

DEKEL170 EC should be applied at a dosage of 86 - 150 ml/15 L of water. Apply once 15-17 days after transplanting onion seedlings and when weeds are between 2-4 leaves stage.

DEKEL170 EC is absorbed by the foliage and roots, and translocated throughout the plant.

Pre-harvest interval/Re-entry period: 7-10 days
