ADAMA West Africa

Application rates:

Water Volume	Product rate
200L	500ml - 1.2L/ha
80L	200 - 500ml/Acre
15L	60 - 80ml /15L Knapsack

Mixing:

Fill the spray tank with half the required amount of water. Add the recommended amount of Agil 100 EC and mix thoroughly. Top up the spray tank with water to the required level and agitate well to ensure thorough mixture.

Application Timing

Spray only when weeds have emerged in these crops. Best time to apply is when weeds are at 5 to 10 leaves stage.

Always read the label carefully before use

ADAMA

Agil®

A selective, systemic post-emergence Herbicide for control of grass weeds in a wide range of broadleaf crops such as water melon, lettuce, pineapple, yam, cassava, okra, pepper, cotton, tomato and legumes.

ADAMA

Agil® herbicidal activity and mode of action

BENEFITS FOR THE FARMER

Highly effective

Capable of controlling hard to kill grasses, which allow good crop development

Fast acting

- Stops competition of the weeds with your crop immediately
- Symptoms visible within 5-7 days, so it's easier to manage your farm

Flexible and ease of use

- Larger application window
- Agil can be used in large number of crops
- No need to use Surfactant
- Rain fast in 1 hour – you can use Agil under variable weather conditions

Crop safety

Safe at recommended dosage to all of the registered crops

No residue in soil

No restriction on following crops

No impact on environment

Very safe compound for humans & environment
