RUSH 24 ALL IN™

HOW IT WORKS

Group 4 herbicides disrupt normal plant growth, resulting in twisting and cupping of leaves, epinasty and death of susceptible plants in 2–10 days.

REGISTERED AND SUPPORTED TANK MIXES

Wheat only:

- Everest® 3.0
- LADDER ALL IN®
- Simplicity™ GoDRI™¹
- Traxos®
- Varro®

Wheat and barley:

- Assert® 300 SC

Quick Tips

RUSH 24 ALL IN™ activity is influenced by weather conditions. Optimum activity requires active crop and weed growth. The temperature range for optimum activity is 12°C to 24°C. Reduced activity will occur when temperatures are below 8°C or above 27°C. Frost before application (3 days) or shortly after (3 days) may reduce weed control and crop tolerance. Weed control may be reduced during stress conditions, for example drought, heat or cold stress, or if weeds have initiated flowering, or if heavy infestations exist.

Always read and follow label directions.
