This product may be tank mixed with a fertilizer, a supplement, or with registered pest control products, whose labels also allow tank mixing, provided the entirety of both labels, including Directions For Use, Precautions, Restrictions, Environmental Precautions, and Spray Buffer Zones are followed for each product. In cases where these requirements differ between the tank mix partner labels, the most restrictive label must be followed. Do not tank mix products containing the same active ingredient unless specifically listed on this label.

In some cases, tank mixing pest control products can result in reduced pesticide efficacy or increased host crop injury. The user should contact ADAMA Agricultural Solutions Canada Ltd. at 1-855-264-6262 for information before applying any tank mix that is not specifically recommended on this label.

MIXING INSTRUCTIONS:

1. Clean spray tank and ½ fill with clean water. Start agitation or bypass system.
2. If a broadleaf herbicide, insecticide or fungicide is to be used, add the product FIRST prior to adding LADDER ALL IN® and agitate for 2–3 minutes.
3. Add correct amount of LADDER ALL IN®. Agitate for 3–5 minutes before adding remainder of water and then maintain constant agitation.
4. After any break in spraying operations, agitate thoroughly before spraying again.
5. Use the spray suspension as soon as it is prepared.
6. If an oil film starts to build up in the tank, drain tank and then clean with a detergent.

NOTE: If tank-mixing, please reference the label of the partner for specific mixing order or follow WAMLEGS or WALES for proper mixing protocol.

PRE-HARVEST INTERVAL:

60 days

STORAGE:

May be stored at any temperature.

GRAZING RESTRICTIONS:

Observe a minimum of 3 days before grazing livestock on treated crops.

CROP ROTATION:

No restrictions.

QUICK TIPS:

Avoid application when heavy rain is forecasted.
Use higher application rate when targeting Persian Darnel or in cases of heavy grassy weed infestation.
LADDER ALL IN® contains an internal adjuvant; do not add an external surfactant.

Always read and follow label directions.
