ESTEEM ALL IN®

HOW IT WORKS:

Moves within the plant to control exposed and underground plant tissues. It mimics naturally occurring plant hormones which control weeds by disrupting normal plant growth patterns. Symptoms of effect include epinasty (twisting of the stems) and swollen nodes.

CROP STAGING:

Spring Wheat, Durum Wheat, Spring Barley and Oats: 3-leaf to just before the flag leaf.
 Winter Wheat in the spring: 3 tiller stage to just before the flag leaf.

This product may be tank mixed with a fertilizer, a supplement, or with registered pest control products, whose labels also allow tank mixing, provided the entirety of both labels, including Directions For Use, Precautions, Restrictions, Environmental Precautions, and Spray Buffer Zones are followed for each product. In cases where these requirements differ between the tank mix partner labels, the most restrictive label must be followed. Do not tank mix products containing the same active ingredient unless specifically listed on this label.

In some cases, tank mixing pest control products can result in reduced pesticide efficacy or increased host crop injury. The user should contact ADAMA Agricultural Solutions Canada Ltd. at 1-855-264-6262 for information before applying any tank mix that is not specifically recommended on this label.

MIXING INSTRUCTIONS:

1. Fill sprayer tank ½ full of water.
2. Start sprayer tank agitation.
3. Add the required amount of ESTEEM ALL IN®.
4. Fill the sprayer tank with sufficient water and maintain sufficient agitation in the spray tank during mixing and spraying to ensure a uniform spray mixture.

NOTE: If tank-mixing, please reference the label of the partner for specific mixing order or follow WAMLEGS or WALES for proper mixing protocol.

PRE-HARVEST INTERVAL:

Wheat, Barley or Oats: 60 days

Forage: 7 days

GRAZING RESTRICTIONS:

Do not cut or graze treated fields of wheat, barley or oats within 7 days after application.

Withdraw meat animals from treated fields at least 3 days before slaughter.

STORAGE:

Do not freeze.

CROP ROTATIONS:

Fields previously treated with ESTEEM ALL IN® can be seeded to wheat, barley, oats and rye (not under-seeded to forage legumes, clover or alfalfa), canola, field peas, flax, forage grasses, mustard, or can be summer-fallowed.

For field peas: a rainfall of 140 mm (5.5 inches) between herbicide application and August 31, and an annual precipitation greater than 175 mm (6.9 inches) is required.

Always read and follow label directions.
