PROTECT YOUR SOYBEANS

HERBICIDE

INSECTICIDE

FUNGICIDE

DAVAI® 80 SL

Broadleaf and grassy weed control in a convenient package that allows for flexible tank-mix options in peas, dry beans and soybeans.

ACTIVE INGREDIENT:

Imazamox 80 g/L

HERBICIDE GROUP:

Group 2

APPLICATION RATES AND ACRES TREATED:

- Rate: 100 ml/ac
- Acres Treated: 80 ac/jug

PACKAGING:

- Case: 2 × 8 L jugs

REGISTERED CROPS:

- Dry beans
- Peas
- Soybeans

KEY BENEFITS:

- Controls Roundup Ready® Canola in Roundup Ready® Soybeans
- Customizable tank-mix options
- Excellent re-cropping options
- Proven broadleaf and grass control
- Concentrated formula means less packaging

KEY WEEDS CONTROLLED:

Broadleaf weeds

(Cotyledon to 4 leaf stage):

- Cleavers¹
- Cow cockle
- Flixweed
- Green smartweed
- Lamb's quarters
- Persian dandel
- Redroot pigweed
- Shepherd's purse
- Stinkweed
- Stork's bill
- Volunteer canola (non-Clearfield® varieties)
- Wild buckwheat¹
- Wild mustard

¹Suppression

Grass weeds

(1–4 true leaf stage or early tillering):

- Barnyard grass
- Green foxtail
- Japanese brome grass¹
- Volunteer barley
- Volunteer canary seed
- Volunteer tame oats
- Volunteer wheat
- Wild oats
- Yellow foxtail

HOW IT WORKS:

DAVAI® 80 SL is readily absorbed through both leaf and root uptake and it is translocated in the plant to inhibit amino acid production and cell division. Plant growth is inhibited, and a few days after application, chlorosis and terminal bud death become evident. Leaves and stems become yellow and purple, and root growth may be inhibited. Crop competition is quickly reduced, although complete plant death is relatively slow.

SUPPORTED TANK MIXES:

- ARROW ALL IN®
- ARROW® 240 EC
- Basagran® Forté
- Broadloom®
- Leopard®
- PHANTOM® 240 SL

MIXING INSTRUCTIONS:

1. Use 40 L/ac (10 US gal/ac) of water.
2. Use a 50-mesh (or coarser) filter screen.
3. Fill the spray tank $\frac{3}{4}$ full with water.
4. Add the required amount of DAVAI® 80 SL herbicide solution directly into the sprayer through the tank opening.
5. Agitate until herbicide is thoroughly mixed.
6. Continue agitation and add the required amount of the tank-mix partner.
7. Continue agitation while adding the required amount of recommended adjuvant.
8. If excess foaming occurs, a silicone anti-foaming agent may be added (e.g. Halt®).
9. Complete filling the tank to the desired level with water.

CROP ROTATIONS:

- Barley
- Canary seed
- Canola*
- Chickpeas
- Corn
- Flax
- Lentils
- Oats
- Peas
- Soybeans
- Clearfield® sunflowers
- Wheat (spring, durum)

*If less than 150 mm of rainfall between time of application and August 15th, it is strongly recommended to refrain from growing canola the following year.

PRE-HARVEST INTERVALS:

- Peas: 60 days
- Dry beans: 75 days
- Soybeans: 85 days

GRAZING RESTRICTIONS:

Do not graze treated crop. Peas may be fed to livestock 30 days after application.

STORAGE:

Do not freeze.

ADJUVANT RATES:

- 0.5% v/v Methylated Seed Oil
- 0.25% v/v Nonionic Surfactant

QUICK TIPS

Cool weather conditions or drought will delay herbicidal activity and if prolonged, may result in poor weed control. Use of DAVAI® 80 SL herbicide in hot, humid weather may result in temporary leaf yellowing, leaf flecking, bronzing or burning. The crop usually outgrows this condition within 10 days. When weeds are stressed due to drought, flooding, hot or prolonged cool temperatures (15° C or less), control can be reduced or delayed since weeds are not actively growing. Weed escapes or regrowth may occur under prolonged stress conditions or low fertility. Do not make applications to weeds stressed longer than 20 days due to lack of moisture, as unsatisfactory control can result.

Always read and follow label directions.

For best results, apply below 25° C.	Apply at 10° C or warmer due to high viscosity.	Do not mix with copper products, jar test.	SORATEL™ is the first of many ADAMA products that will include Asorbital™ Formulation Technology, offering reduced run-off and photodegradation, improved rainfastness and more thorough protection of the foliage.	Good spray coverage and canopy penetration are important to achieve the best results.

These are just a few of our many herbicide, insecticide and fungicide offerings. To see our full product portfolio for soybeans, please visit our website at [ADAMA.com](https://www.adama.com)

WHY IS ADAMA DIFFERENT?

We are all in this business because we love agriculture...the business of 'growing'... the passion of feeding our communities, our country, and the world. **It's that simple.**

But getting to that end result, especially in this last decade, has unfortunately become anything but simple.

At ADAMA, we think it's time for a change. And our driving philosophy—**Listen > Learn > Deliver**—was developed with that change in mind.

We **LISTEN** to the retailers and distributors, the growers, our employees, and the agronomic scientists who are continually working to ensure our industry is the most profitable, agronomically sound and sustainable that it can be.

From those same people, we **LEARN** what they need from crop protection companies, and from ADAMA specifically, to help them achieve and exceed those goals.

What we have learned is:

- The myriad of products available is overwhelming.
- Getting supply and delivery of products on time and correctly can be a challenge.
- Complicated grower programs take precious time away from dealing with what matters most.

Basically, what could be simple, is not anymore.

So, with that in mind, ADAMA has a desire to be different! We hire people who truly embody our philosophy, not only to listen, and learn but to develop and **DELIVER**:

- 270+ available actives that allow growers to deal with fewer chemical companies, reducing the complexity of the retail order
- The ability to fast track tank-mix solutions for key pests as we don't need to work with other companies
- The ability for growers to target a myriad of key pests with ADAMA products alone
- No grower programs...just great products and a great price with great service.

In short, products, solutions and services that help us all to focus on what we collectively are and have always been passionate about.

Listen ▶ Learn ▶ Deliver

It can be that simple.
