# ARMORY ALL IN®

## HOW IT WORKS:

ARMORY ALL IN® works on contact to disrupt plant cells, leading to more rapid drydown of plants and weeds when compared to systemic herbicides. Harvesting can typically begin within 4–10 days, depending on crop and weather conditions.

## MIXING INSTRUCTIONS:

1. Fill tank  $\frac{3}{4}$  full with water.
2. Turn on agitation and keep it on throughout mixing and spraying.
3. Add correct amount of ARMORY ALL IN®.
4. Fill with remaining required water.

## GRAZING RESTRICTIONS:

Crop residue remaining after harvest (e.g. pea vines, alfalfa stems) may be used as a feed supplement for livestock.

## STORAGE:

Do not freeze.

## EFFECTS OF WEATHER:

**Drought:** Efficacy may be reduced due to thickened plant cuticles to prevent water loss from the plant.

**Late-season Moisture:** Efficacy may be reduced due to late-season growth in indeterminate crops.

## Quick Tips

Apply ahead of sunny weather, sunshine activates the herbicide. Applications made on, during, just prior to or during periods of darkness (prior to sunshine) will increase effectiveness.
