This product may be tank mixed with a fertilizer, a supplement, or with registered pest control products, whose labels also allow tank mixing, provided the entirety of both labels, including Directions For Use, Precautions, Restrictions, Environmental Precautions, and Spray Buffer Zones are followed for each product. In cases where these requirements differ between the tank mix partner labels, the most restrictive label must be followed. Do not tank mix products containing the same active ingredient unless specifically listed on this label.

In some cases, tank mixing pest control products can result in reduced pesticide efficacy or increased host crop injury. The user should contact ADAMA Agricultural Solutions Canada Ltd. at 1-855-264-6262 for information before applying any tank mix that is not specifically recommended on this label.

MIXING INSTRUCTIONS:

1. Fill spray tank ½ full with water.
2. Add the required amount of FORCEFIGHTER ALL IN[®] and agitate thoroughly.
3. Add any tank-mix partners.
4. Fill the tank and agitate again before use.

NOTE: If tank-mixing, please reference the label of the partner for specific mixing order or follow WAMLEGS or WALES for proper mixing protocol.

Quick Tips

FORCEFIGHTER ALL IN[®] combines three active ingredients and two modes of action to deliver more broadleaf weed killing power per acre than comparable products. In fact FORCEFIGHTER ALL IN[®] has 13% more active ingredient per acre than the competitive product.

Do not apply before the 2-leaf stage as crop injury may occur. Use 38 L/ac application volume when there is a heavy canopy or when most weeds are at an advanced stage of growth. Activity is influenced by weather conditions. Optimal application temperature is 12 – 24° C. Avoid application 3 days before or after frost and do not apply by air.

Always read and follow label directions.
